

Welcome!

Welcome to the first post.

We're opening a new project: the study and development of our mind.

Unfortunately, people don't know what a human being represents. People have to deal with a very complex and complicated machinery. Far more complex than the plane, the steam-engine or the most ingenious robot ever built. People don't know much about the evolution, the structure and the possibilities of development of this complicated machinery called the Human Being. People don't even acknowledge the simplest of their functions because they don't know the purposes of these functions. They imagine that a person is responsible for his/her evolution.

But this occurs only when we learn to drive our own machinery. Just like a robot learns to do math, like a plane learns to fly or a train to transport. It's not easy to develop and learn all these abilities. Our machinery has been created by nature for one purpose. We'd be far from the truth to state that it's the instinctive needs.

It's fair to say that, at the moment, the way we look at the consciousness and knowledge in general is at a very basic level.

Therefore, in this first project ever made in Romania, destined for the evolution of the human mind. Let's begin!

Mental Training = Happy Life = Will and Power

Share these thoughts and you'll help your friend achieve transformation.

The group of the clean and clear minded people salutes you.
